

# Winter Accessories

## ICE EQUALIZER PILLOW

- Relieves structural stress from pool frame and wall.
- Equal water stabilization on top of the cover makes cover removal a snap.
- Use 1 pillow for rounds
- Use 2 pillows for ovals  
OR rectangles.

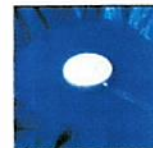

## AQUADOR

- Eliminates costly "drain down" for winterizing
- Protects skimmer from winter freeze up

## COVER PUMPS

Manual and electric cover pumps remove excess water buildup, which makes your cover last longer and relieves stress on the pool frame

## COVER CLIPS

Cover Clips clip and hold your cover to the top rails. They prevent wind damage by minimizing cover movement.

Use 2 per  
Top Rail

## COVER WRAP

Cover Wrap eliminates damage caused by high winds and tough winter elements. Helps prolong the life of your cover.

## POOL ANTI-FREEZE

Pool anti-freeze is used to winterize all underground plumbing which prevents freeze damage during the winter months.

Our pool anti-freeze is non-corrosive and can be released into the pool in the spring. It is safe for all types of pool plumbing, has a balanced PH and protects piping to -50°F.

**Ask a sales associate for main drain closing directions**

## WATER TUBES

Sandwiches cover to deck to stop air infiltration. Dual or Single Chamber tubes.

### HOW TO INSTALL

1. Place Water tubes on deck and cover before adding water leaving 12" of space.
2. Fill water tubes 2/3 full to allow for expansion during freezing months.

## CARTRIDGE CLEANER

Removes grime, oil and organic debris and restores filter efficiency. Simply soak your element filter and rinse.

## WINTER PLUGS

Inlet plugs prevent the back up of pool water. Main drain plugs prevent accidental discharge of anti-freeze. Plugs come in threaded or expandable

**Don't Forget about your Winter Cover and Leaf Net!!**
