

Before you begin...

1. *Check pH:* The desired range is from 7.2-7.8
2. *Check Balancers:* Alkalinity should be within the range of 80-120ppm.
3. Be sure there are no metals in the water.
4. *Condition new water:* Add ___ lb. stabilizer (1lb per 10,000 gallons)
5. Install a Frog Mineral Reservoir into the Pool Frog Cyclor.
6. Replace cap and run Pool Frog Cyclor with Pool Frog Mineral Reservoir for *10 minutes on setting 10.*
7. Insert Frog Bam into Pool Frog Mineral Reservoir in Pool Frog cyclor, without removing seal, press down firmly. *Run pool for 90 minutes-* allowing Frog Bam to circulate through pool.
8. When *chlorine in pool is lower than 1ppm*, add Bac Pac to Pool Frog Mineral Reservoir. Set control dial according to chart below.

Maintenance!

1. Add ___lb. powdered shock every 2 weeks (1lb per 10,000 gallons)
2. Replace Bac Pac as needed (Add when chlorine is lower than 1ppm).
3. Add ___oz. Frog Bam every 90 days (24oz per 10,000 gallons)
